HTML/CSS Developer

# Taisiia Morhunskaya

Good day afternoon! My name is Taisiia. I'm 33 years old. I am sure that if you do what you really love, you will not work a day in your life. I strongly believe that work can and should be enjoyable, and therefore I follow the call of my heart and look for a small web studio with a friendly team for remote work, in order to create beautiful modern web applications together. I'm a creative person and I have great pleasure in the layout process. I can make competent semantic markup, write styles in CSS or in Sass. I have experience in team work with a project, I use bundlers (Webpack, Parcel) and the Git version control system. In addition, I have experience in marketing, print design, photo retouching and writing. It can be useful in developing a turnkey websites or web applications. I have an easy character, so I will perfectly fit into the collective and become a useful, responsible team member.

## My projects

1. <https://qa-testing.netlify.app/>  
[ Final team project. A web application for QA specialists. I had done everything related to the visual part of application interface. ]
2. <https://taisiia-filikova.github.io/final-team-project-JS/>  
[ Team project after JS course. A web application for film enthusiasts. My part: modal windows (card of one movie and command page), layout of the "My library" page. ]
3. <https://taisiia-filikova.github.io/final-team-project-HTML-CSS/>  
[ Team project after HTML/CSS course. Website of the virtual barber shop. Performed the gallery section. ]
4. <https://taisiia-filikova.github.io/goit-markup-hw-08/>  
[ Personal project with HTML/CSS. Virtual web studio site. All layout is completely mine. ]
